

INTRODUCING

HSE

HSE-UAV.COM

The Road Runner is a fast and easy to use tendering system designed by a drone operator for drone operators. The Road Runner easily slides into the box of any full-sized pickup and carries everything needed to spray for the day. With very little set up/tear down time and a mobile workstation for shorter ferrying times the Road Runner will help you increase the efficiency of your drone as well as help you enjoy your time spraying. The Road runner also comes equipped with a 4'x4' elevated line of sight platform for the operator and a workstation for your ground crew to make the Road Runner a perfect tendering solution

Features

- Side toolbox for battery charging and storage
- Steel base with fork slots for easy loading
