

Olympus Dictation, Life Simplified.

Save time and capture your voice with Olympus' newest simple and flexible digital recorder.

FEATURES

- Dual-directional stereo recording capability
- Triple-layer sound studio pop-filter blocks breath and wind vibrations
- Directional Stereo Recording available for Conference settings
- Easy dictation management with DSS Player Standard
- Designed for anyone in a position where recording makes life simpler, from construction foreman to professional blogger

With advanced features including a superior noise canceling system, 4-position slide switch, and three different recording formats, the DS-2600 will increase dictation management efficiency. Equipped with dual microphones to control the directionality, keep the focus on the person dictating and suppress ambient noise in offices, cars, airports and other noisy environments. A triple layer studio quality filter ensures accurate voice capture while reducing unwanted sounds such as breath and wind vibrations. This ensures superior accuracy for high quality recordings, enhancing software transcription ability.

Built with an intuitive design and equipped with a 4-position slide switch, the DS-2600 is designed to be productive and dependable, for individuals working in any environment. Complete with a wide range of editing options for easy text creation to quickly modify your files, the DS-2600 will make turning recordings into notes as effortless as possible.

DS-2600 Digital Recorder

Olympus makes dictation simple with the DS-2600, providing an easy to navigate user interface and dual-directional stereo recording for public and crowded spaces, ideal for professionals and individuals who get things done.

SPEECH RECOGNITION WITH ACCURACY, CLARITY AND NOISE-REDUCTION

Dual microphone technology settings ensure optimization for many different recording environments. For example in noisy environments such as a coffee shop or construction site, use narrow directionality to ensure the voice is accurately captured.

BUILT IN PROFESSIONAL QUALITY STUDIO RECORDING

The included studio quality pop-filter reduces additional noise from wind and breath noise, encouraging effortlessly clearer recordings regardless of your environment.
