OLYMPUS®

RM-4010P & 4015P

RecMic II Series

CAPTURE YOUR VOICE WITHOUT UNWANTED NOISE

The power to deliver exceptional accuracy and EHR/PACS integration

Create clean, accurate verbal records efficiently with the Olympus RecMic II. This series of desktop dictation microphones combines advanced technologies in an innovative noise canceling system ideal for noisy environments. Designed for M*Modal Fluency Direct users, the RM-4015P model launches the application right from the microphone, eliminating the need for software on every workstation.

Intelligent dual microphones control the directionality to keep the focus on the person dictating, and suppress non-voice noise eliminating anything outside the human frequency range. In addition, a triple-layer studio-quality filter blocks traditionally problematic sounds including breath noise. The RecMic II microphones retain accurate spoken audio without any distortion while suppressing unwanted noise, making desktop dictation easy.

Features

‣ Intelligent dual microphone cancels unwanted background noise

‣ Triple-layer sound studio pop filter blocks mouth noise

‣ Antimicrobial housing keeps equipment hygienic

‣ Microphone stand offers optimal hands-free dictation

‣ Trackball for improved navigation

‣ Smooth UV coating and silent buttons to reduce touch noise

‣ Internal memory for carrying Fluency Direct app   (RM-4015P)

RecMic II: RM-4010P & RM-4015P

Best-in-class noise canceling capabilities cover any environment with superior accuracy

Accurate & Clear Speech Recognition in a Noisy Environment

Dual microphone technology creates narrow directionality that focuses on the acoustics in front of the microphone and suppresses unwanted noise from the sides and back.

Professional Studio-Quality Filtering

The triple-layer pop filter uses the same technology found in professional studio recording microphones to block unwanted but difficult-to-eliminate sounds such as breath and wind vibrations.

Antimicrobial Body

The housing and buttons on every RecMic II are made of antimicrobial coating materials (ISO 22196). The "tolerance to alcohol" design allows for superior cleanability.

Fluency Direct Portability

Launch M*Model Fluency Direct directly from your microphone. With 8 GB of internal memory, the RM-4015P model is fully integrated with the software so you can carry the application and your profile anywhere—no need to install it on each workstation.
