**Noise Killer**

## Owner's Manual

### Introduction

The Noise Killer is a super easy-to-use smart noise gate pedal with two noise reduction modes. The fast noise detection and smooth attack/release keeps everything quiet without affecting the notes you played.

### Precautions

#### READ CAREFULLY BEFORE PROCEEDING

Please keep this manual in a convenient place for future reference.

#### Power Supply

Always use a DC 9V center negative AC adapter. Use of an adapter other than that specified could damage the unit or cause malfunction and pose a safety hazard.

Always connect the AC adapter to an AC outlet that supplies the rated voltage required by the adapter.

Disconnect the AC adapter from the AC outlet when during lightning storms or not using the unit for an extended period.

#### Connections

Always turn off the power before connecting or disconnecting. Make sure to disconnect all cables and AC adapter before moving the unit. This will help prevent malfunction and damages.

#### Environment Considerations

Avoid using the unit in any of the following conditions that could cause malfunction:

- Extremely hot or cold places
- Under direct sunlight
- Magnetic fields
- Near heaters and other heat sources
- Sandy or dusty places
- Places that are extremely humid or exposed to splashing water

- Places with lots of vibrations

#### Electrical Interference

Devices that are very susceptible to interference or that emits powerful electromagnetic waves (e.g. radios and TVs) should not be placed near this unit, as interference could occur.

Electromagnetic interference could cause malfunction and could corrupt or destroy data.

Always operate this unit at a suitable distance from these devices.

#### Handling

Do not apply excessive force to the switches and other controls, exposing the unit to strong impacts, which could cause it to break.

Do not put foreign objects or liquids into the unit.

Never open the case or attempt to modify the product in any way since this can result in damage to the unit.

Clean only with a soft, dry cloth.

### Overview

#### ● Sensitive But Smooth

The Noise Killer features smart, fast noise detection and smooth attack/release time. It reduces background noise effectively when you're not playing without tone sucking.

#### ● Less Is More

No complex, annoying noise gate settings any more! Connect this unit to your pedalboard or amp, set a threshold

level, and done.

### ● Two Modes

The Noise Killer offers two noise reduction modes for satisfying different musicians. For most scenarios, set it to SOFT mode; if you need stronger noise reduction, set it to HARD mode.

### ● Carefully Selected Components

The Noise Killer is designed and built with carefully selected components to ensure best sound quality and road performance. The solid Aluminum-alloy chassis ensures touring reliability, and True Bypass design gives you a transparent tone.

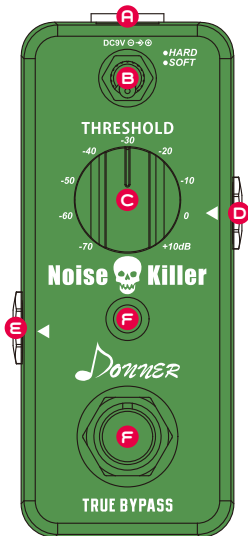

### Features

- Compact dual-mode noise gate pedal
- Fast noise detection, sensitive but smooth noise reduction
- Wide threshold range suitable for every music style
- True bypass provides transparent tone
- LED indicator shows the working state
- Enduring, light-weighted Aluminum-alloy chassis

### Specifications

Power Requirement: 9V DC center negative  
Current Consumption: 26mA  
Dimensions: 42x93.5x52mm  
Weight: 230g

### Connections & Controls

**A DC 9V Jack:**  
For power supply, use a 9-volt DC regulated by AC adapter, 500mA (plug polarity is positive on the barrel and negative in the center).

**B Mode Selector:**  
Selects from two modes:  
**HARD:** Faster, harder noise reduction  
**SOFT:** Softer, smoother noise reduction

**C THRESHOLD Knob:**  
Controls the noise gate threshold.

**D Input Jack:**  
1/4" mono audio jack, for connecting guitar.

**E Output Jack:**  
1/4" mono audio jack, for connecting to an amplifier.

**F Footswitch and LED:**  
Tap to switch the unit on/off. The LED will lit up when the effect is on.
