

Breathe Easy and Live Pain-Free

with a forgotten supplement even
naturopaths neglect to prescribe.

Do you remember a time when you could breathe easily and had plenty of energy to get through your day? A time when pain, fatigue, and irritability weren't even a part of your vocabulary? If you suffer from chronic bronchitis, autoimmune disease or chronic pain, get ready to turn all that around with a commonly-overlooked amino acid!

Chronic bronchitis is a chronic inflammatory condition of the lungs that affects millions of people worldwide. Chronic bronchitis is most often caused by smoking, inhalation of chemical irritants and toxins, and allergies.

Chronic bronchitis primarily affects those aged 45 and older with women developing the condition more often than men.

Symptoms of chronic bronchitis include coughing with sputum, wheezing, rattling in the chest, chest tightness, fatigue, difficulty breathing, swollen legs, ankles, and feet, and in severe cases, a bluish tinge to the skin due to lack of oxygen.

The most common conventional treatment for chronic bronchitis is inhaled corticosteroids and oxygen therapy. The trouble with this type of treatment is what it does not address the underlying cause of chronic lung inflammation.

Also, inhaled corticosteroids can cause terrible side effects when used over a long period of time.

These side effects include adrenal gland suppression, easy bruising, osteoporosis, muscle weakness, oral thrush, weight gain, mood disturbances, hair loss, increased risk of high blood pressure and diabetes, cataracts, and glaucoma.

The good news is you don't have to suppress your immune system or take a potentially life-threatening synthetic drug to treat your chronic bronchitis. *Nutri NAC* is your complete natural solution to treat chronic bronchitis while decreasing body-wide pain and inflammation.

N.A.C. is an essential form of an amino acid called cysteine. This amino acid is used by the body to make glutathione, (GSH), a critical antioxidant millions are unaware they have a deficiency in.

N.A.C. is absolutely critical for proper immune system and cardiovascular function. N.A.C. inhibits pro-inflammatory cytokines, suppresses NF-kappa B and regulates the gene for COX-2 thereby preventing inflammation and pain.

As important as this amino acid is to the human body, most conventional physicians and a surprising number of naturopathic physicians don't prescribe it. Even educated natural health enthusiasts have never heard of it.

Unlike conventional treatments for chronic bronchitis and other inflammatory conditions, *Nutri NAC* is specially-formulated to boost your immune system fast with a powerful dose of antioxidants.

With *Nutri NAC*, you never have to worry about side effects.

Nutri NAC at a Glance

- ✓ *Chronic Bronchitis/ COPD Relief*
- ✓ *Potent Pain and Inflammation Relief*
- ✓ *Detoxification*
- ✓ *Powerful Flu Protection*
- ✓ *H. Pylori-Induced Gastritis and Ulcer Relief*
- ✓ *Protection Against Cancer*
- ✓ *Improved Insulin Sensitivity*
- ✓ *Heart Disease Prevention*
- ✓ *Memory Support*
- ✓ *Anti-Aging*

Nutri NAC Offers Bronchitis and Pain Relief without Side Effects

Chronic bronchitis sufferers often turn to inhaled corticosteroids to get short-term relief from wheezing, chest tightness and cough. All inhaled corticosteroids do is suppress your immune system so you no longer experience the symptoms. You still have chronic bronchitis; you just won't be aware of the symptoms as much anymore. This is not an effective way to treat any disease.

In addition to doing nothing but suppressing your immune system and your symptoms, these drugs have some pretty serious side effects associated with them.

These side effects include:

- ❌ Risk of infections
- ❌ Delayed wound healing
- ❌ Oral thrush
- ❌ Adrenal dysfunction
- ❌ Easy bruising
- ❌ Thinning skin
- ❌ Weight gain
- ❌ Mood changes
- ❌ Hair loss
- ❌ Increased risk of high blood pressure
- ❌ Increased risk of diabetes
- ❌ Cataracts
- ❌ Glaucoma
- ❌ Osteoporosis

With *Nutri NAC*, you never have to worry about side effects. *Nutri NAC* doesn't suppress your immune system and give you a brief respite from symptoms; it heals your body from the inside out.

N.A.C. is an essential form of an amino acid called cysteine. This amino acid is used to make glutathione, (GSH), a critical antioxidant millions are deficient in. N.A.C. is absolutely critical for proper immune system and cardiovascular function. It inhibits pro-inflammatory cytokines, suppresses NF-kappa B and regulates the gene for COX-2 thereby preventing inflammation and pain.

When you suffer from any type of chronic pain, chronic inflammation or autoimmune condition, it's a sign that your immune system is malfunctioning in some way. The best way to treat these conditions is to use antioxidants to boost your immune system, not steroids and narcotics to suppress it.

When you add *Nutri NAC* to your diet, you're giving your immune system a powerful boost. Within just a few weeks of taking it, you'll notice that your lungs feel clearer. That constant chest tightness will disappear. You'll have more energy, sleep better, and even notice an improvement in your mood.

If chronic joint or muscle pain is a problem for you, *Nutri NAC* will take care of it. Its rich antioxidant content turns off pro-inflammatory compounds while boosting your immune system so you can move with a freedom and ease you haven't felt in years. Regular supplementation with *Nutri NAC* can be a night-and-day, life-changing experience for anyone living with chronic pain and fatigue.

Even More Health Benefits from *Nutri NAC*

Not only does N.A.C. offer pain and chronic inflammation relief, it has a profound effect on your overall health and well-being.

Here are just some of the incredible health benefits N.A.C. can provide:

Heart Disease Prevention

Nutri NAC increases nitroglycerin levels and protects against ischemic and reperfusion damage. It has an anti-platelet and coronary dilating effect that reduces the risk of sudden death from heart attack. N.A.C. also lowers lipoprotein levels, which helps prevent cardiovascular disease.

Cholesterol Management

N.A.C. prevents LDL ("bad cholesterol") from becoming oxidized and causing inflammatory damage to blood vessels. It also lowers homocysteine levels, which prevents the build-up or arterial plaque.

Diabetes Management

Cardiovascular disease and diabetes often go hand in hand. Clinical research has shown that nitric oxide production is greatly reduced in patients with diabetes. Nitric oxide is necessary for proper platelet aggregation and relaxation of the smooth

muscles of the coronary system. N.A.C. increases insulin sensitivity and provides the necessary antioxidant boost needed to increase nitric oxide levels and prevent serious disease.

Protection Against Disease

Disease is a sign that the immune system is malfunctioning. *Nutri NAC* provides the antioxidant boost you need to prevent many different types of disease. Scientific evidence has suggested that N.A.C. boasts strong anti-carcinogenic properties.

Memory Support

The powerful antioxidant boost provided by N.A.C. helps decrease brain inflammation while improving overall neurological function.

Anti-Aging Benefits

Free radicals are unstable oxygen molecules that run rampant throughout your system, causing the oxidative distress that leads to premature aging. *Nutri NAC* combats this distress with potent antioxidants, clearing your body of those free radicals so you look and feel years younger.

Liver Detoxification

Alcoholism, obesity, and hepatitis can contribute to liver malfunction and failure. N.A.C. can help detoxify your liver and prevent the progression of disease.

Flu Protection

N.A.C. is invaluable during cold and flu season because of its powerful immune-boosting properties. If you're the type who often succumbs to colds and flu during that time of the year, adding *Nutri NAC* a few months beforehand can keep you snuffle-free all season!

Gastritis and Ulcer Relief

H. pylori is a bacterium responsible for the development of up to 85% of gastrointestinal ulcers. N.A.C. inactivates this bacterium, thus reducing gastrointestinal inflammation and ulcers. Unlike the antibiotics commonly used to treat these common stomach disorders, *Nutri NAC* provides the antioxidant and immune support necessary for complete and lasting recovery.

One of the more unknown affects of N.A.C. is its ability to stabilize mental health problems such as bipolar disorder and schizophrenia.

The strong antioxidant content helps increase brain glutathione levels, which, in turn, decreases anxiety, mania, and obsessive compulsive symptoms.

According to a published case study, N.A.C. supplementation seems to target the core symptoms of reward-seeking addictive behaviors like gambling.

It has also been shown to decrease addictions to cocaine, nicotine, and marijuana.

How to Take *Nutri NAC*

N.A.C. has been used by naturopathic physicians for over 40 years with minimal-to-no side effects, even at very high doses. For best results, take one (1) 600 milligram capsule once per day and gradually build up to 3,000 milligrams as tolerated. For added antioxidant benefit, add a vitamin C supplement.

Unlike other natural supplements on the market, *Nutri NAC* has only two non-medical ingredients. These ingredients are magnesium stearate (vegetable source) and hypromellose.

When you choose *Nutri NAC*, you're making a solid investment in your health and well-being. *Nutri NAC* doesn't just heal your chronic pain and boost your immune system; it also provides you with added protection against cardiovascular disease.

Nutri NAC is made and manufactured in Canada and is a health food store exclusive.

Don't spend one more day struggling with chronic bronchitis and inflammation. Pick up your own bottle of Nutri-NAC today. You'll be amazed at the lasting improvement in your health!

Breathe Easy
and live
Pain-Free

- Supports respiratory health
- Prevents LDL (bad cholesterol) oxidation to help support cardio health
- Supports detoxification
- Supports glutathione production (an important antioxidant)
