- Z015990 - 19mm Black Enamel Gold Plated Round Charm
- A008808 - 7mm Gold Plated 16 Gauge Round Jump Rings - 25 Pack

Tool Suggestions:

Chain Nose Pliers
Scissors

Directions:

1. Open Jump Ring, slide on enamel charm and attach to the bottom of the wood & resin crescent. Close jump ring.
2. Open another jump ring, slide through the top hole of wood & resin crescent. Close jump ring.
3. Open another jump ring, attach to the jump ring from Step 2 and close jump ring.
4. Cut deer skin leather lace to desired length. We suggest a minimum of 36 inches which will make an approximately 18 inch necklace. Note* - there is no clasp on this design. Just an overhand knot so you will want to make sure you can easily slip it over your head.
5. Fold the leather in half, slide looped end through Large Open Frame Hoop and jump ring from Step 3. Make a lark's head knot. Do not pull too hard on the leather as it can break if pull too hard.
6. Make an overhand knot to both ends of the leather together.
