DIY0158 DIY Black Leather Cuff with Natural Chinese Turquoise Cabochons Bracelet
Components List

- ☐ (1) Z011820 - 15mm Black Leather Cuff with Silver Snaps
- ☐ (4) CAB-NCT5SQU - Natural Chinese Turquoise 5mm Square Cabochon
- ☐ (3) CAB-NCT8SQU - Natural Chinese Turquoise 8mm Square Cabochon

Tool Needed:
- Loctite (Z007890)
- Optional: - Tweezers or Jewel Setter (A011802)

Directions:

1. Unsnap the cuff and lay flat.

2. Start by marking where you want to add your cabochons. Heidi used a metallic marker so it would show up on the black leather. In this design she measured the middle of the cuff and started with one of the large square cabochons, then spaced out the rest a ¼" on each side.

3. Start gluing your cabochons. The Loctite super glue is so easy to use, just a little drop and then position your cabochon where you want it.
    •** NOTE - Loctite does not dry immediately. The glue will fully cure in 12-24 hours. Do not wear until it's fully cured.
