### Directions:

1. Open a 4mm jump ring and slide in onto the 3 Cut 6/0 bead. Close the jump ring.
2. Add another jump ring to the same bead and close the jump ring.
3. Repeat steps 1 and 2 to make a total of 6 "connectors".
4. Using the 3mm jump rings, attach five (5) of the "connectors" together to make a chain of beads.
5. Open a 4mm jump ring and attach it to one end of the chain of connectors and then attach it to the hole in the inside of the "U" shaped component. Close the jump ring.
6. Using a 4mm jump ring (or the 3mm - which ever you chose), attach one of the TierraCast dagger charms to the bottom of the chain of connectors.
7. Using a 3mm jump ring, attach the last "connector" to the top hole on the "U" shaped connector and close the jump ring.
8. The loop on the ear wire opens like a jump ring. Attach it to the top "connector" and close it.
9. Repeat all the steps for the other earring.
