

DIY0195 DIY Locked Up In Love Pearl Bracelet and Earring Set - Gold  
**Components List**

**Tools Needed:**

- Two Chain Nose Pliers
- Round Nose Pliers
- Cutter

- (1) **Z012147** - Potato Freshwater 6-6.5mm Natural Pearl Strand
- (1) **Z013007** - Locked Up in Love Crystal Heart Charm Set - Gold Plated
- (1) **Z012178** - Gold Plated Adjustable Wheat Chain Bracelet Sliding Clasp
- (1) **Z016762** - 21mm Gold Drop Bar Post Earring with Loop
- (10) **TC02908** - 4mm Gold Plated Heishi Disk Bead by TierraCast
- (1) **A019586** - 1 Inch Gold Plated 24 Gauge Eyepins
- (1) **Z011514** - 5mm Gold Plated 18 Gauge Round Jump Rings - 25 Pack
- (1) **Z010381** - Gold Plated Wire Guardian - 0.58mm from Beadalon
- (1) **FTBW0001** - Soft Flex FINE Gauge 0.014 Inch Diameter Beading Wire
- (1) **A004833** - 2mm Gold Plated Crimp Tubes
- (2) **TC01250** - Clear Rubber Earring Backs

**Directions:**

1. Attached a jump ring to one of the large heart charms and set it aside.
2. Cut a piece of Soft Flex about 5-6" long.

3. Slide a crimp tube onto one end of the Soft Flex piece, then slide the tail of the Soft Flex through the tunnel on one end of the wire guardian. See photo.

4. Slide the tail around the curved "channel" of the wire guardian, out through the tunnel on the other side, and then back through the crimp tube. Tighten the Soft Flex so the crimp tube is snug against the bottom of the wire guardian and the Soft Flex is securely in the "channel". See photo.
5. Using a chain nose pliers, or flat nose pliers, make a simple flat crimp. Make sure you flatten the crimp so it is parallel to the wire guardian.
6. Make sure you have a small "tail" coming out of the flattened crimp tube.
7. Slide on one of the TierraCast Heishi Disk beads, then trim the tail so it is flush with the Heishi bead.
8. Slide on a pearl bead, then another Heishi bead, continue until you have 4 pearls stranded.
9. Slide on another Heishi bead, then add the charm from step 1, then another Heishi bead.

Directions continued:

10. Add a pearl, Heishi bead, and continue until you have 4 more pearls added. Total of 8 pearls on the bracelet - or add more if you so choose. Just make sure you have enough Soft Flex cut.

11. Add another Heishi bead, then slide on a crimp tube, then slide the tail of the Soft Flex through the tunnel on one end of the wire guardian.

12. Slide the tail around the curved "channel" of the wire guardian, out through the tunnel on the other side, and then back through the crimp tube.

13. Backtrack the tail through the last Heishi bead, and push the tail so it stick out between the last Heishi bead and the pearl bead next to it.

14. Using your chain nose pliers, gently tug the tail so that the Soft Flex sits securely into the "channel" of the wire guardian.

15. Use caution when tugging the Soft Flex, you don't want it too tight but also no gaps between the beads.

16. Once you have your tension just right, using your chain nose pliers, make a simple flat crimp. Make sure you flatten the crimp so it is parallel to the wire guardian.

17. Trim the tail in between the last Heishi bead and pearl. Tuck the tail into the Heishi bead hole.

18. Open the jump ring on one end of the adjustable bracelet and attach it to one of the wire guardians. Do the same to the other side. \*\*NOTE - if you need to make the adjustable bracelet a little shorter, remove the jump rings and trim the chain, then reattach the jump rings. Just use caution to not trim too much.

To make the earrings:

1. Slide a pearl onto one of the eye pins, trim and make a simple loop.

2. Attach one of the mini heart charms to on end of the eye pin by opening the loop like a jump ring and close it.

3. Open the other side of the eye pin like a jump ring and attach to the hole on the bar post earring and close it.

4. Repeat for the other earring.
