

## DIY0197 DIY Love Chain Reaction Necklace - Gold and Amethyst

### Components List

- (2) **CH00314** - 7mm Gold Plated Flat Curb Chain Link
- (1) **Z008935** - 21mm Satin Gold Round Toggle Clasp
- (1) **PEN-AME30-45-GP** - Amethyst Rough 35-45mm Gold Tone Plated Pendant
- (1) **A008808** - 7mm Gold Plated 16 Gauge Round Jump Rings - 25 Pack

### Tools Needed:

- Two Chain Nose Pliers
- Heavy Duty Cutter or Memory Wire Cutter

The chain is very thick so you will need a heavy-duty cutter to cut it.

### Directions:

1. Cut chain to desired length. The clasp will account for about 1" of the necklace length. If you want the necklace to be 18" long, cut 17" of chain.
2. Using a jump ring, attach the loop on the toggle clasp bar to one end of the chain and with another jump ring, attach the loop on the ring portion of the toggle clasp to the other side of the chain.
3. The pendant comes with a bail on it, so gently pry open the bail and attach it to the ring portion of the toggle clasp. Gently close the bail.
