

This USB Arc lighter is a precision product manufactured to the highest quality and safety standard.

HOW TO USE

- 1.a. Turn on the switch located at the front or bottom of the lighter. Slide the lever or press the button to ignite.
- b. Cigarette/cigar Lighters; Open the lid; Press the power button to ignite.
- 2. Hold the Arc to the material to ignite.
- 3. Close the lid to turn off or release the button.
- 4. All Arc lighters automatically shut off after 7-12 seconds.

*****Certain lighters have on/off switches. Ensure it is OFF when not in use*****

HOW TO CHARGE

- 1. Connect USB cable to the Arc lighter and plug the cable into any USB port. Charge the lighter using AC power, computer, power bank or a car charger.
- 2. Lighters take 1-2 hours to charge.
- 3. **NEVER** keep your lighter plugged in overnight. This prevents overheating and extends battery life.

HOW TO CLEAN

- 1. Make sure lighter is off while cleaning.
- 2. Residues can build up around the tip of the lighter which can affect the operation.

USE ONLY a clean dry brush or cloth to gently brush the tip.

DO NOT use any abrasives or liquid cleaner.

ENSURE the tip of the Lighter is clean at all times for best performance

WARNING!

Strictly abide by the following safety measures

KEEP AWAY from children & pets lighters are not toys.

DO NOT touch the arc when ignited.

KEEP the lighter away from any persons face, skin or combustible material.

DO NOT expose the lighter to temperatures above or below 40°C

DO NOT place lighter in direct sunlight while charging.

High temperatures may activate the protection mechanism; preventing the battery from being charged, or cause abnormal current or voltage when charging leading to fire overheating or explosion.

ENSURE the spark is extinguished after using.

REMOVE the lighter from the flame once it is lit.
