Section 1 product and company identification

Product name: SEALLED LEAD ACID BATTERY
Trademark: RITAR
Company name: RITAR POWER (VIETNAM) COMPANY LIMITED
Address: Lot A21, Road C4, TTC Industrial Zone, An Hoa Commune, Trang Bang Dist, Tay Ninh Province, Vietnam
Post code: 84000
E-mail: info@ritarpower.com
Fax: 0755-2730313
Emergency Phone: 0755-2730361

Section 2 composition/information on ingredients

Pure chemical □ Mixture ■

Chemical ingredients:

Section 3 hazards summarizing

Classification of Danger: (see section 14)

Invasion Route: eyes, skin contact, ingestion

Health Hazard: The Valve-regulated lead-acid batteries are not hazardous when used according to the instructions of manufacturer under normal conditions. In case of abuse, there's risk of rupture, fire, heat, leakage of internal components, with could cause casualty loss. Contact with internal components may cause irritation or burns to eyes and skin. Abuses include but not limited to the following cases: charged for long time, short circuited, put into fire, whacked with hard object, punctured with acute object, crushed, and broken.

Environmental Hazard: The internal electrolytemay cause adverse environmental impacts

The Danger of Burning and Exploding: May occur fire or explosion in high temperature or short circuit.
Section 4 first-aid measures
The valve-regulated lead-acid batteries are not hazardous with eye and skin contact under normal circumstance. In case of internal hazardous substance leaking, following measures should be taken if body parts contact with these substance:

**AFTER SKIN CONTACT:**
In case of contact, immediately wash skin with soap and copious amounts of water.

**AFTER EYE CONTACT:**
In case of contact, flush eyes with clean water for 15 minutes while lifting eyelids. Get prompt medical attention.

**AFTER INHALATION:**
If inhaled, remove to fresh air. If not breathing give artificial respiration. If breathing is difficult, give oxygen.

**AFTER INGESTION:**
If swallowed, wash out mouth with water provided person is conscious. Call a physician.

Section 5 fire-fighting measures
**Characteristics of Hazard:** Toxic fumes; gases or vapors may evolve on burning.

**Hazardous Combustion Products:** CO, CO2, acid, hydrogen and oxygen gas

**Fire-extinguishing Methods and Extinguishing Media:** Carbon dioxide, dry chemical powder, or appropriate foam

**Attention in Fire-extinguishing:** The Firemen should put on antigas masks and full fire-fighting suits.

Section 6 accidental release measures
When leakage of batteries happens, liquid could be absorbed with sands, earth, or other inert substance, and the contaminated area should be ventilated meantime. Damaged batteries that are not hot or burning should be placed in a sealed plastic bag or container.

Section 7 handling and storage
**Handling:** don't handling the batteries in manner that allows terminals to short circuit

**Storage:** Store and used far away from heat, sparks, open flame, or other heat ignition sources, and under room temperature(<30℃) in ventilating and dehumidifying environments

Section 8 exposure controls/personal protection
**Maximum Allowable Concentration:** No Standard available
Engineering Controls: no engineering controls are required for handling batteries that have not been damaged. Personal protective equipments for damaged batteries should include chemical resistant gloves and safety glasses.

Section 9 Physical and Chemical Properties
Not applicable

Section 10 stability and reactivity
Stability: Stable under normal temperatures and pressures.
Incompatibility: oxidizing agents
Conditions to Avoid: Heat and open flame, short circuit, and water
Hazardous polymerization: Will not occur
Decomposition Products: CO, CO2, acid, hydrogen and oxygen gas

Section 11 toxicological information
This product does not elicit toxicological properties during routine handling and use.

Section 12 ecological information
Ecological toxicity: N/A
Biodegradability: N/A
Non-biodegradability: N/A
Other hazardous: The internal electrolyte may cause adverse environmental impacts

Section 13 disposal
Waste Treatment: Recycle or dispose of in accordance with government, state & local regulations.
Attention for Waste Treatment: Deserted batteries couldn’t be treated as ordinary trash. Couldn’t be thrown into fire or placed in high temperature. Couldn’t be dissected, pierced, crushed or treated similarly. Best way is recycling.

Section 14 transport information
UN NO.: 2800
Proper shipping name: N/A
Packing group: N/A
### Section 15 regulatory information

**Regulatory information**: Recommendations on the transport of dangerous goods-model regulations (15th revised), IATA dangerous goods regulations, International Maritime Dangerous Goods Code, U.S. Hazardous Material Regulations

### Section 16 other information

**Reference**: National standard of People's Republic of China. (GB16483-2008) Safety data for chemical products—Content and order of sections
