The American Public Works Association (APWA) has developed and published its Uniform Color Code for making surface and underground utility lines. The APWA Color Code is a marking guideline that should be used by all professional underground utility contractors. The Color Code helps to prevent accidents and damage to subsurface utility by contractors, excavators, homeowners or anyone that may be digging around underground utilities. Each color represents a specific type of utility that is present below ground as layed out in the Color Guide.

WHITE	Proposed Excavation
PINK	Temporary Survey Markings
RED	Electric Power Lines, Cables, Conduit & Lighting Cables,
YELLOW	Gas, Oil, Steam, Petroleum or Gaseous Material
ORANGE	Communication, Alarm or Signal Lines, Cables or Conduit or Traffic Loops
BLUE	Water, Irrigation & Slurry Lines
GREEN	Sewers and Drain Lines
PURPLE	Reclaimed Water, Recycled Water.
