Spirit & Style

Our team has worked hard to develop metal furniture that combines both form and function. Due to the malleability of metal, we have the ability to create countless design options. Unlike wood, metal furniture has a wide range of colors to work with, from standard primary colors to custom-selected paints. We guarantee high quality finishes that will suite your style.

Durability

Metal furniture lasts a long time because of its inherent properties. All our furniture undergoes testing and treatment for rust and heat resistance. Metal furniture can tolerate heavy usage and does not chip or damage easily. In case there are any missing parts, these are easily replaceable.

Value for Money

Metal is affordable! Due to it's strength and durability, metal generally lasts longer than wood furniture and doesn't run the risk of being exposed to termites. All of our furniture is designed to fit in different room spaces, as we provide flat packing solutions and easy to assemble instructions.

FurnitureKraft International is built on the basis of developing strong, robust furniture. Furniture Kraft was established in 2004, We are cognizant of the varying needs of each of our clients. In order to create personalized solutions, we have created individual brands - Metallika By FurnitureKraft - with a variety of options under each to suit unique design and cost requirements. Our products are exported internationally through a robust distribution network. We export our products across 25 countries, and growing.

We proudly design and develop our entire range of furniture products in India. We combine creativity, craftsmanship and technology to create motel furniture suited for customers seeking comfort and affordable luxury. We source high quality metal raw materials from reputable Indian steel mills, namealy JSW Steel Ltd and Tata Steel. We have gained considerable experience dealing with large format retail companies and online stores, in India and abroad. Most of our materials are sourced locally, ensuring high quality and reduced carbon footprint.
