## GALVANISED

Add a rustic appeal with our galvanised range. The galvanising process adds a protective zinc coating to prevent rusting. This galvanised range is resistant to corrosion and damages caused by long-term commercial use.

## POWERED COATED

Durable and hard-wearing, powder coating uses dry powder that is heat cured to create a resilient outer shell. Providing exceptional wear capabilities, powder coating is long-lasting and food-safe.

## FOOD SAFE

Non-porous and hygienic, our Food Safe products can be used for all manners of foodservice. Free from rust and corrosion, these products are ideal for long-term commercial environments.
