

GOLF BALL TESTING

2023

SNYDER®

SNYDER GOLF BALL TESTING OVERVIEW

Our SNYDER Golf balls have been tested by the **independent golf test laboratory, Golf Laboratories Inc., in San Diego.**

The Golf Lab uses cutting-edge robotic technology in order to test golf balls and assess their quality. The test results show e.g. launch angle, spin rate, ball speed and total distance information.

Through those tests we are not only able to tell you which ball suits you best, but we are also **able to classify the quality of our golf balls.**

All our golf balls are in the **highest quality category of each class** and are in fact no rank behind the top golf balls on the market.

This document **aims to provide an overview of the test results** of the SNYDER models SNY Ace, SNY ProX, SNY Pro and SNY TOUR, compared to the Titleist ProV1.
