Sample **Sunset Gelato - Bold Blend**

Sample ID	SD230615-019 (79761)	Matrix	Concentrate (Inhalable Cannabis Good)
Tested for	High Roller LLC	Received	Jun 14, 2023
Sampled	-	Reported	Jun 20, 2023
Analyses executed	CANX		

Laboratory note: The estimated concentration of the unknown peak in the sample is 5.46%. Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated bio products) from which we believe to be either (+)-8-THC or d9-THC. At this time there are no reference standards available for (+)-8-THC. (+)-8-THC is a different compound from the main (-)-8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)-8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)-8-THC and d9-THC with the majority, if not all, of the concentration being (+)-8-THC. Total (+/-) d8 Concentration is estimated to be: 85.41%

Results are reported on an "as received" basis unless indicated otherwise. When a Pass/Fail status is reported, that status is intended to be in accordance with testing, state, and local laws which are required for the customer to be in compliance. The measurement of uncertainty is not included in the Pass/Fail evaluation unless explicitly required by federal, state or local laws and has been reported on the certificate of analysis. Measurement of uncertainty is available upon request.
