

FOR IMMEDIATE RELEASE

## Nightstick Announces Industry First Magnetically Rechargeable ATEX Zone 0 Headlamp

### The Best Just Got Better With Model XPR-5554G

**Wylie, Texas – July 2021** - Nightstick, a global manufacturer of innovative, professional portable safety-rated lighting products, raises the bar of performance and flexibility with another edition to their growing ATEX Zone 0 Intrinsically Safe rechargeable products.

There has been huge demand for more rechargeable Intrinsically Safe (IS) headlamps with an ATEX Zone 0 rating and Nightstick solves that problem with the XPR-5554G.

Featuring MagMate™ charge coupling, there is no more searching for the charge port or flipping the connector from one side to the other, trying to figure out which way to insert it. Simply open the cover and hold the connector near the port, and it automatically snaps into place and begins charging your headlamp. With no rubber plug to pull out or cap to get torn off, you can be confident that your headlamp will stay completely waterproof even while charging.

Weighing a mere 85 grams and rated at an impressive 160 lumens, the XPR-5554G delivers certified lighting in the most demanding hazardous environments. It is constructed with durable, thick-walled engineered polymer and can outlast the most challenging worksites. This headlamp is powered with a lithium-polymer battery with runtimes up to 16 hours.

“The Nightstick XPR-5554G fills a major void in the intrinsically-safe certified market today by offering an ATEX Zone 0 rechargeable headlamp that hard-working hazardous environment professionals can afford,” says Russell Hoppe, Marketing Director for Nightstick. “We know our customers need to focus on completing their job with confidence, knowing their equipment was designed with the highest levels of safety when *life depends on light*.”

Utilizing double fault analysis, the XPR-5554G carries a Zone 0 certification for ATEX and IECEx IIC gas groups (hydrogen, acetylene) and a T4 temperature rating (135° C). Additionally, it is UL 913 certified Class I Division 1 making it a globally certified product.

A limited lifetime warranty supports the Nightstick XPR-5554G headlamp, which are now in stock and available for immediate purchase. To learn more, please visit [www.nightstick.com](http://www.nightstick.com).
