FLY-WL-MAP-23

WEAPON LIGHTS

PERFORMANCE, QUALITY AND VALUE

REAL-WORLD PERFORMANCE

Nightstick weapon lights are designed to perform under the most stressful conditions where superior lumens, candela, beam distance, and run-time matter. When life depends on light, Nightstick weapons lights answer the call of duty. We build Nightstick weapon-mounted lights using the most powerful and efficient LEDs and durable engineered polymer or machined aircraft-grade aluminum housings. We also utilize precision engineered reflectors and reliable, intuitive switches. During design and engineering phases, all weapon lights are intentionally subjected to rigorous recoil testing protocols to ensure 100% functional consistency when making split second decisions is ultimately warranted.

Many of our weapon lights feature daylight visible green lasers, providing visual confirmation and confidence for maximum accuracy and reliable visibility regardless the time of day. We've integrated innovative electronic circuit designs like programmable optional strobe and battery safe mode that feature the latest generation battery technology for flexibility and peace of mind while on duty.

UNWAVERING COMMITMENT TO QUALITY

Designed and engineered in Texas, we manufacture our products in dedicated ISO 9001 certified factories. Each model undergoes rigorous quality control inspections by independent 3rd party inspectors at multiple points during the manufacturing process. Additional quality control inspections occur as products arrive and leave our distribution facilities. This commitment to excellence continues throughout the Customer Service experience with a goal of 100% customer satisfaction, backed by our Limited Lifetime Warranty.

COMPLETE LINE OF HIGH PERFORMANCE WEAPON LIGHTING
