**FOR IMMEDIATE RELEASE**

**Nightstick Adds Green Laser With New TCM-550XL-GL**  
Popular Compact Weapon Light Now Features Daylight-Visible  
Green Aiming Laser

**Wylie, Texas – October 2020** - Nightstick, a global manufacturer of innovative, professional lighting products is pleased to announce its newest TCM-Series compact LED handgun weapon light with a daylight-visible 532nm green aiming laser for maximum visibility in all conditions. The light shares the same intuitive dual rear-facing switches already a standard feature on the TCM-550XL and XLS (strobe) models, providing the shooter tactile, click actuation in momentary or constant-on use.

The [TCM-550XL-GL](#) features a compact TIR (Total Internal Reflection) lens delivering a 550-lumen bright white beam, rated for 2.5 hours that illuminates objects up to 136 meters (446 feet) away. Weighing in at a featherweight 2.5 ounces, constructed of aircraft-grade aluminum and rated as IP-X7 waterproof, this weapon light is engineered to provide robust illumination and bright laser aiming point during critical low-light threat identification and target discrimination. The light, laser, or light & laser modes can be deployed on demand by holding one switch down while toggling through the modes with the alternate. The laser is easily zeroed to the user's preferred distance with built-in elevation and windage adjusters. The weapon light also features a bezel-activated 'safe mode' battery lockout, eliminating accidental activation of the light and laser during storage or transportation.

"Based on great feedback from our successful launch of the TCM-550XL, we heard an overwhelming demand for a green laser version of the same weapon light," says Russell Hoppe, Marketing Director for Nightstick. "Consulting with our engineers, we accepted the challenge and designed a one-piece, fully-machined aluminum weapon light body that incorporated a rugged and powerful day-light visible green laser. The green aiming laser adds alignment confirmation and added peace of mind in a defensive or tactical situation *when life depends on light™*."

Designed to fit a broad range of handguns, the newest TCM features a spring-loaded rail clamp and convenient coin-cut screw head for toolless installation. Ready to install out of the box, the light includes five handgun-specific rail inserts, laser adjustment Allen wrench, and one CR123 lithium battery. The TCM-550XL-GL is backed by a limited lifetime warranty. To learn more, please visit [www.nightstick.com](http://www.nightstick.com).
