**FOR IMMEDIATE RELEASE**

**Nightstick Introduces TSM-13G for Sig Sauer® P365 Models**  
Rechargeable Light/Laser Features Daylight-Visible Green Aiming Laser

**Wylie, Texas – Sept 2020** - Nightstick, a global manufacturer of innovative, professional lighting products continues to grow its new TSM-Series of subcompact handgun weapon lights with the [TSM-13G](#). Designed to securely mount to front of the trigger guard and dustcover of Sig Sauer P365, P365XL and P365 SAS pistols, the li-ion powered light features a magnetically-coupled MagMate™ USB charging cable that eliminates the need to replace multiple disposable coin cell batteries after every hour of use. The TSM-13G's white light and green laser are designed to maximize threat identification and target discrimination in a variety of concealed carry, home defense and tactical applications. The light's dual switches provide the shooter tactile, click actuation in momentary or constant on use.

The TSM-13G features an LED delivering a 150-lumen bright white beam and 2700 candela for 45 minutes to illuminate objects and threats up to 104 meters (341 feet) away. Weighing in at scant 1.3 ounces, the light is constructed of durable, impact-resistant engineered polymer and rated as IP-X4 water resistant. The light, laser or light & laser modes are activated by holding one switch down while toggling through the modes with the alternate. The laser is easily zeroed to the user's preferred distance with built-in elevation and windage adjusters.

"Following the significant increase in handgun sales recent years, Nightstick is introducing the TSM-Series line of subcompact weapon lights to serve the needs of the self-defense and concealed-carry market." says Russell Hoppe, Director of Marketing. "The TSM-13G rechargeable subcompact weapon light with green aiming lasers is designed to provide Sig Sauer subcompact handgun owners without accessory rails, a small, low profile integrated weapon light for target and background identification *when **life depends on light**™.*"

The TSM-13G comes with installation Allen screwdriver, MagMate USB charging cable and complimentary combination gun lock for added safety and peace of mind while charging. The light is backed by a limited lifetime warranty. To learn more, please visit [www.nightstick.com](http://www.nightstick.com).
