Nightstick Launches Improved 650-Lumen Compact Handgun Lights
Adds TCM-10 and green laser-equipped TCM-10-GL models

Wylie, Texas - Nightstick, a global manufacturer of professional portable LED lighting products announces the launch of its latest TCM-10 Series compact handgun weapon lights, [TCM-10](#) and [TCM-10-GL](#) models.

Both new models feature ultra-performance LEDs and an optimized TIR lens, delivering a brighter and longer-reaching 650-lumen beam for up to 2 hours, illuminating objects up to 136 meters away. The TCM-10-GL also comes with a daylight-visible 532nm green aiming laser, which is easily zeroed to the user's preferred distance with built-in elevation and windage adjusters.

Weighing only 2.5 ounces, constructed of aircraft-grade aluminum, and rated as IP-X7 waterproof, these lights are designed to provide robust illumination and a bright laser aiming point during critical low-light threat identification and target discrimination. Both lights feature intuitive dual rear-facing switches, programmable ON/OFF strobe mode, and a 'Safe Mode' battery lockout to prevent accidental activation during storage or transportation.

"As major law enforcement agencies nationwide continue moving away from the larger handgun weapon lights in favor of smaller, more secure holsters, we knew they wanted the highest possible performance from a compact single CR123-powered handgun weapon light," says Brian Whalen, Public Safety Marketing Manager for Nightstick. "Leveraging improved LEDs and optimized circuit design improvements we created these two new weapon lights to provide law enforcement and handgun owners a more powerful and function-rich compact weapon light for threat identification and confirmation, *when life depends on light™.*"

The Nightstick TCM-10 and TCM-10-GL are engineered to fit over 240 handguns with accessory rails and include a spring-loaded rail clamp and a convenient coin-cut screw head for toolless installation. Ready to install out of the box, the lights include five handgun-specific rail inserts, Allen wrench, and one CR123 lithium battery. Both lights come with a limited lifetime warranty.
