WYLIE, Texas - April 2020 - Simplifying the experience of finding an Intrinsically Safe (IS) lighting product to match required safety rating, Nightstick announces their recent upgraded [Light Finder™](http://Nightstick.com/LightFinder) online product compatibility tool at nightstick.com/lightfinder.

This simple filter allows users to search by Class, Division, and Zone ratings for North American, ATEX, and IECEX certifications as well as ratings like NFPA and MSHA. The easy-to-use tool creates a one-stop destination that searches the ever-expanding line-up of Nightstick IS lights to find the perfect product to protect employees from the hazardous environment where they work.

"As a global leader in the manufacture of portable intrinsically safe LED lighting solutions, our goal is to help Safety Managers find the correct product for their specific working environment," says Derek Box, Industrial Marketing Manager at Nightstick. "Finding the correct certification is critical, and we wanted to provide an interactive tool to help users quickly identify the products in our 45+ piece IS line-up that matches the exact rating."

Nightstick Light Finder also provides links to product-specific videos, specifications, and instruction manuals as well as a list of global Nightstick dealers. These online resources make the process of finding the perfect Nightstick intrinsically safe light quick and easy, especially for distributors and safety professionals at all levels who want to confirm certification before, during, and after the sale. Learn more at www.nightstick.com/lightfinder.
