ROLL MASTER SYSTEMS®

BEST TARPS, INC. INTRODUCES

YOU HAVE HAD A MANUAL ROLL SYSTEM.....IT IS **TIME TO EVOLVE**

The **Roll Master Evolution Electric System** features our powerful Roll Master HD motor attached to our gear reduction system, insuring your tarp is tight and secure at all times with the exact torque needed for load protection and containment. This powerful system is designed to walk over heaped loads with ease.

The Evolution offers heavy duty black anodized arms backed by a lifetime warranty against breaking.

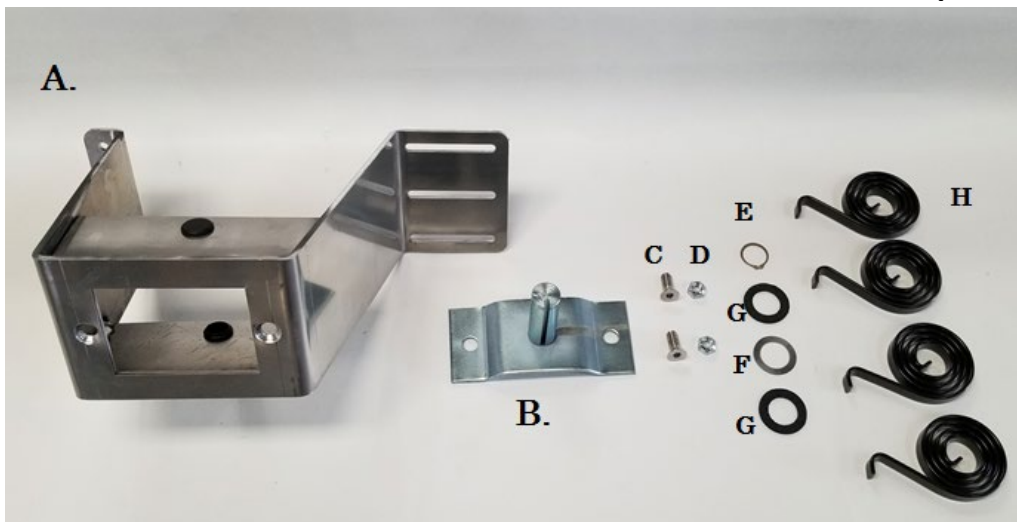

The Evolution can be fitted to most trailers in the industry. This system can be used to convert your manual crank system to one that opens and closes your tarp by the simple push of a button from the comfort of your truck, or by the optional remote control.
