

Emergency Plans Box™ (EPB) Specification Sheet

The Emergency Plans Box is designed to provide premises plans and information to the Fire & Rescue Service in a recognised format. Latest fire safety guidance BS9999:2017 Annex O calls for operational information being available to the Fire & Rescue Service as well as HM Government guidance notes on fire safety risk assessments which call for the provision of information to the Fire & Rescue Service under section 7.3.

For use in internal locations (for more secure systems please refer to the Standard PIB or High Security PIB Certified (HSS PIB® C). Note that for high rise residential building applications, the High Security Premises Information Box(tm) (PIB)R is required as per recommendations in the FIA / NFCC 'Code of Practice for the provision of Premises Information Boxes in Residential Buildings'.
