

## Sentinel Overlay Tool Quickstart:

The Sentinel Overlay Tool provides an easy way to layout a custom overlay for your Sentinel Video System. Utilizing a drag and drop interface it is simple for you to add sponsor logos and arrange data fields for YOUR car to better represent your brand.

To get started:

1. Install the tool from the support site
2. Launch the tool
  - a. Select the resolution you have configured for your Sentinel stream
3. Create your overlay using the existing image files included in the package or add your own
  - a. Add your own PNG files directly to the IMAGES folder
    - i. Default directory is C:\CRP\sentinel\_overlay\_tool\images
4. Save your configuration
5. Create a youtube stream and start the stream from the sentinel web config
  - a. <https://scc.candelaria-racing.com>
6. Download the key file from the advanced page of the web config tool

7. Copy this file to the KEYS directory
  - a. Default location is C:\CRP\sentinel\_overlay\_tool\keys
8. Upload this config to the Sentinel
  - a. SIGN OUT of the web configuration tool
  - b. Wait for your youtube stream to reflect the update.
