Please read and understand this manual carefully before using this product.

1. Overview

ISMOD II Plus is a heat not burn device which comes with a built-in large capacity lithium battery, two smoking holders and a large charging base that makes it portable, convenient and durable.

2. Package Content

3. Parameter

Model	ISMOD II Plus
Power Requirement	Battery Capacity(2600mAh, 3.7v) Maximum Discharger Current: 2A
Charger Time	Power bank charger time: 3h Tobacco Rod charger time: 6minutes
Charger Method	USB Charger Port: Micro USB Charger Setting: 5V/2A
Working Temperature	5-40 C
Product Size	101mm*55mm*21mm
Product Weight	115g

4. Operating Instructions

5. Usage Instructions

- Remove heating rod from power bank
- Put the heat stick into the heating rod
- Press the button and hold for 1.5 seconds, Heating rod starts to preheat.
- Wait for 15 seconds until the device vibrates to indicate the pre-heating process has been finished
- When blue light turns solid you can start smoking. When the smoking reaches 12 puffs, a prompt vibration is generated and the blue light flashes. When smoking reaches 14 puffs or when the heating time finishes, the device stops working and a prompt vibration is generated.

Remove the heat stick along with the protective top cover after finish

Remove the heat stick

Warnings:

When smoking is complete, pay attention to the warning sign on the internal insulation of the heating rod while removing the heat stick. When putting back the protective cover, ensure it is installed the correct way to prevent any damage to the heating rod.

Stopping smoking at any stage

- If you need to stop smoking during the smoking operation, press and hold the control switch for 1.5 seconds, the heating rod will stop working and enter the shutdown state, and the indicator light will go out and a vibration prompt will be generated
- Under the normal working conditions of smoking, after the smoking is completed, the heating rod generates a vibration prompt, and the tobacco rod indicator lights flashes and then enters the shutdown state.
- After the smoking is completed, put the tobacco rod back to the charging base for charging to work, so that it can be used again next time.

Note: Under the normal smoking working state, if the amount of smoke is significantly reduced, or the smoking taste is weakened, it means that the smoke has been used and the cigarette needs to be replaced.

6. Charging instructions

- Charging Bank operation instructions**
 - It is recommended to charge the charging Bank for the first time to ensure the normal use of the product.
 - When you are ready to charge the main unit, align the charging cable with the USB charging port and the other end for the power connection.
 - When charging, the charging indicator of the host will flash in sequence until the indicator is solid, indicating that charging is complete.
