UNIFORM MANAGEMENT SYSTEM

The band uniform order is to be accompanied by a Uniform Management System program with the following features:

The system will be a cloud-based application which is accessible from any modern internet connected device: PC, Mac, Android Tablet or Phone, iPhone, iPad.

The system will manage student information regarding the assignment of band uniforms and is alterable on a continuing basis as sizing needs change.

The system will be capable of loading in the school's data directly from their uniform order.

The system will contain an AUTO-ASSIGN feature which automatically assigns uniform pieces to the students based on their entered measurements.

In addition, the student database will include (at user's discretion) full contact information for student and guardian, and will possess the ability to generate address labels and garment bag identification tags.

The system will also produce (customizable) student uniform rental/usage agreements as per needed.

The system will have the ability to generate customizable reports.

The system will allow importing and exporting of student and uniform data.

The system will allow the creation and assignment of additional users to access the specified student and uniform information.

The system will facilitate backup and restore of the user's data as desired.

The system will be protected by a Web Application Firewall (WAF).

The system administrator must provide technical support FREE OF CHARGE.
