

# FLOW METER SERIES M123 (COMPACT)

## SPECIFICATIONS:

<b>Material:</b>	PSU (Polysulfone) and PVC
<b>Range:</b>	0.0066 - 4.4 USGPM
<b>Size:</b>	3/8" - 1"
<b>O-rings:</b>	EPDM standard (Viton optional)
<b>End connectors:</b>	PVC union ends for PVC and PSU models
	Also available in FNPT unions
<b>Float:</b>	PVDF on all models
<b>Head Loss:</b>	3/8" and 1/2" flow meters: 1.81" water column or 0.066 psi
	1/2" flow meters: 3.26" water column or 0.12 psi

## FEATURES:

- ✘ Rugged and corrosion proof
- ✘ May be inserted and removed radially
- ✘ Available with special scales for almost all liquids and gasses
- ✘ Guide rail for accessories
- ✘ Measuring tube labeled with nominal diameter, measuring range and material
- ✘ PVDF plastic floats and inserts are standard
- ✘ Available in measuring ranges from 1.5-1.000 l/h
- ✘ Less space required due to short unit length

## Operation:

The type M123 plastic flow meter is based on the well known "suspended float" principle and is used for measuring and monitoring flows in closed pipes. The medium flows upwards through the flowmeter and raises the float. The flow rate can be read off against a scale on the flowmeter body. The indication point corresponds to the largest diameter of the float.

The standard M123 plastic flowmeter is fitted with a scale for water and two limit indicators.
