

FLOW METER SERIES M23 FULL SIZE

SPECIFICATIONS:

Material:	PA (polyamide) PSU (polysulfone)
Size:	1" - 2.5"
Range:	0.066 - 2.64 USGPM
O-Rings:	EPDM standard (Viton optional)
Accessories:	Limit switches

FEATURES:

- ✘ Break and corrosion proof
- ✘ May be inserted and removed radially
- ✘ Available with special scales for almost all liquids and gasses
- ✘ Guide rail for accessories
- ✘ Limit switches, flow transmitters for remote indication
- ✘ Measuring tube labeled with nominal diameter, measuring range and material
- ✘ PVDF plastic floats and inserts are standard
- ✘ Available in measuring ranges from 15-60 l/h

Operation:

The type M23 plastic flowmeter is based on the well known "suspended float" principle and is used for measuring and monitoring flows in closed pipes. The medium flows upwards through the flowmeter and raises the float. The flow rate can be read off against the scale on the flowmeter body. The indication point corresponds to the largest diameter of the float.

The standard type M23 plastic flowmeter is fitted with a scale for water and two limit indicators.
