

Taku Collection

HENNEPINMADE

Raw meets refined.

The Taku collection features hand-cast glass pieces merged with the finest metals to create two distinct lights. Two glass textures and five metal finishes options play out across the collection—all leveraging course natural detail with polished finishes for a unique and beautiful composition.

Providing wonderful ambient light for when setting a mood is key. Taku's small compact shape is an elegant and versatile fixture that adds a compliment to high design without taking too much attention. The integrated LED is hidden behind the metal cover to give it a radiant glow with an internal diffuser so the glass has two layers of light diffusion giving it the most uniform light qualities possible.
