2 B type Installation Accessories

Water Hose (Thick)

Remote control
Each product may use a different remote controller.

Wax Ring Water Pipe Ring Plate Water Shutoff Valve

Wall Mount

AA Batteries (x3) Screws (x2) Anchors (x2) Strainer Filter

2 Remove Existing Toilet

- Close the water shutoff valve and flush the toilet.

- Remove the toilet and wax ring, leaving the exposed trap (pictured below).

* If you will not install the toilet immediately, cover the exposed trap to eliminate any fumes

3 Install the toilet base

1 A type Installation Accessories

- Attach the provided water hose to your water shutoff valve.

*You may need to use the included conversion nut to fit your water shutoff valve. Simply screw the conversion nut into the 1/2" side of the hose before connecting it to your water shutoff valve.

2 B type Installation Accessories

1. Close the water gauge.
2. Remove dust and sand in the water inlet when installing the shutoff valve.
3. Wind Teflon tape around the water pipe
4. Connect the pipe with the shutoff valve.
5. Connect the Strainer Filter.

- Apply the new wax ring to the exposed trap.

- Line up the toilet base over the closet bolts screws. Place the toilet base and re-secure the closet bolts.

*A team of two people is recommended to correctly place the toilet base.

4 Attach Bidet Seat

- Feed the water hose through the back of the toilet base and attach it to the underside of the bidet seat.

REMOVING THE BIDET SEAT

The bidet seat can be removed by pulling the tabs beneath the unit forward and lifting up.

- Attach the bidet seat to the toilet base by lining up the mounting hooks and pressing down until you hear a "click".

*Do not use excessive force when attaching the bidet seat to the toilet base.

Open the water valve first and then plug-in the power.

- Open the water shutoff valve.

No.1

- Plug in the power cord.

No.2
