3. VM-001D / VM-001S

Feminine water pressure control (Adopted in VM-001D)

The water pressure will be increased by turning the knob counterclockwise.

Posterior water pressure control

The water pressure will be increased by turning the knob clockwise.

Posterior nozzle cleaning (Adopted in VM-001D)

The nozzle will clean itself automatically while using the 'Posterior wash'.

Posterior nozzle cleaning (Adopted in VM-001S)

The nozzle will clean itself by turning the knob counterclockwise.

- After washing gently at first and gradually adjust the strength, remove the remaining water with a little toilet paper or towel. Because the water pressure can be easily adjustable during use, you can also experience the massage effect by quickly adjusting the intensity
- Use your function to your preference.
- If you rotate the posterior water pressure control slowly from 'low → high', the nozzle will be drawn out and water will be sprayed.
- If you rotate the feminine water pressure control slowly from 'low → high', the nozzle will be drawn out and water will be sprayed.
- After each function, return the water pressure control to its original position.
