

FR FLEECE GROUND GLOVE

#1 IN DURABILITY YOUNGSTOWN GLOVE SKU # 12-3575-60

Youngstown's **FR Fleece Ground Glove** is the glove every Ground Glove user should have for colder temps. We took our top selling Ground Glove design and upgraded the goat grain to be water resistant. For the reinforcement layer we use an untreated goat suede to enhance grip in wet conditions. The entire interior of the glove is lined with a soft, cozy, flame resistant fleece. This model is less bulky than other winter gloves to ensure maximum dexterity throughout the workday. The FR Fleece liner provides the right amount of warmth in cold weather. It is not designed for extreme freezing temperatures but rather the more common cold weather most states face in fall, winter & spring.

FLAME RESISTANT	Exceeds Industry Standards According to ASTM D6413
