Why we love it

Taking home the title for a second year in a row, Delta Children's multifunctional changing table will be with you for years to come. It comes with a high-sided changing top so you can pop in a standard-sized changing pad and do all your diaper changes from a comfy height. Once your baby's potty-trained, the changing station comes off and you've got a beautifully simple dresser with three spacious drawers.

Good to know: You'll have to buy a changing pad separately to use on your dresser.
