PROS

- + Great cargo space
- + Remarkable sun protection

CONS

- Harder to collapse

You'll be able to trek through the heat or the cold thanks to this wagon stroller's fun additions. It's a wagon in the truest sense of the word, with a deep cavity that stores both stuff and children, as well as dual handles for pushing or pulling. While it doesn't have the leg well like the Evenflo, it's roomy enough for a comfortable ride.

The outside of the wagon has a wonderful cooler that does a solid job of keeping your food warm or cold, which is great for parents who are pumping or have bottles in tow. The addition of a car seat adapter makes this a fab choice for parents of toddlers and newborns alike.

Last but not least, this stroller wagon's unique roll-down shade feature is perfect for keeping cool on hot days, thanks to its UPF-rated shades.
