1. A beautiful modern **4-in-1 crib** that converts to a toddler bed, daybed, and sofa. No more spending money on furniture for the kid's room when you purchase this *baby!*

Promising review: "Perfect minimalist aesthetic to compliment any nursery. The crib was easy to assemble and isn't cumbersome. We look forward to our daughter growing with this bed (the different stages it can accommodate was an extremely appealing factor)." —[ihuygens](#)
