### Test Results

### About

The Delta Children Emery 4 in 1 Convertible Crib is part of the Cribs test program at Consumer Reports. In our lab tests, Cribs models like the Emery 4 in 1 Convertible Crib are rated on multiple criteria, such as those listed below.

**Ease of assembly:** Ease of assembly is based primarily on the amount of time required to assemble the crib, clarity, accuracy and explicitness of the instructions, whether or not the correct hardware was included and whether there was easy access to areas where fasteners must be tightened securely.

**Construction:** Construction incorporates mattress support integrity, types of hardware used, and sample defects, if any.

**Changing mattress height:** Assesses the ease of changing the mattress support from one height setting to another. The mattress support is at the highest setting for a newborn, and is lowered as the child grows, to help prevent falls or climbing out.
