**7. Best Sustainable Pack 'N Play: Delta Children babyGap Deluxe Play Yard, \$160**

**Pros:**

- Features a seat fabric that was sustainably made from recycled plastic water bottles
- Includes a removable bassinet and waterproof changing table, along with a plush bear mobile
- Includes a travel bag for easy portability

**Cons:**

- None to speak of

The Delta Children babyGap Deluxe Play Yard is one of the most affordable options you can buy. Not only that, but it's sustainably made, too. All the fabric (excluding the mesh windows) is made from recycled water bottles; plastic drinking bottles are sorted, cleaned and shredded into flakes that then become the yarn the seat fabric is made from.

What's more., this model includes a removable bassinet (with an insert) and waterproof changing table for extra convenience. Its removable toy arm with three plush bears help entertain your little one during diaper changes and play time, too.

With a quick and compact fold that seamlessly packs into its included carrying bag, it's a wonderful nursery crib alternative.
