What's Hot: Adaptive gear, summer fun and environment friendly potty training

Delta Children's **PerfectSize 3-in-1 Potty**

(deltachildren.com/products/perfectsize-3-in-1-potty-made-with-recycled-ocean-plastic, \$19.99) is made with recycled ocean plastics. This multi-functional potty chair serves the changing needs of toddlers-in-training. Use it first as a potty with a removable bowl. When ready, convert it into an adjustable toilet seat that works with most standard round and elongated toilets. When it is no longer needed for potty training, it can be used as a step stool for kids.
