Our Ratings

Assembly 5/5 **Design** 4.2/5 **Portability** 4.5/5

Maneuverability 5/5 **Value** 5/5

Pros

- Seamless assembly
- Maneuvers well on any terrain
- Compact fold

Cons

- Flimsy material on center console

The Little Folks by Delta Children City Wagon Cruiser gave the Keenz 7S 2.0 a run for its money (at more than half the price). We love how the compact, sleek design is lightweight and features many storage options. For example, there are two cup holders and a pocket on the removable center console to store drinks and snacks—though we wish it had more room in the console’s pocket for toys and other items. The console’s material feels flimsy and is our least favorite part of the stroller wagon’s design. Still, you’ll find an additional cup holder and side pockets for adults to store their necessities, like a water bottle and phone. Children aged 9 months (must be able to sit up unassisted) up to 55 pounds can sit comfortably and securely in each cushioned seat with a three-point safety harness. In addition, a removable UV-blocking canopy offers shade and privacy from the sun and the rain.

Assembling the City Wagon Cruiser in our lab was a breeze, with a four-minute assembly time and no instructions necessary. It was easy to see which parts needed to be attached, and everything snapped together seamlessly. We didn’t need any extra strength or heavy lifting to assemble pieces. Breaking the stroller wagon down to fold was just as simple and took us only three minutes. In addition, its folded compact size is very convenient for storing it in the trunk of a car.

Pushing this Delta Children stroller wagon around was enjoyable—even after we loaded it with sandbags and toys—thanks to a height-adjustable handlebar. It requires no arm strength to push or pull the durable steel frame on sand or grass, and it turns beautifully around corners thanks to front swivel wheels. One of our favorite features is how we could pop the stroller wagon up with one foot over concrete blocks—a handy feature if you need to go over a curb.

The \$170 cost of the City Wagon Cruiser makes us feel like kids in a candy shop. From start to finish, we loved the intuitive assembly, sleek design, and wonderful maneuverability. It’s an excellent option for families looking for an affordable stroller wagon that operates consistently without straining your budget.

Price at time of publication: \$170

Key Specs:

Dimensions: 51 x 20 x 47 inches | **Folded Dimensions:** 17 x 13 x 31.5 inches | **Product Weight:** 36.3 pounds | **Age Recommendation:** 9 months up to 55 pounds (child must sit up unassisted before use) | **Wagon Weight Limit:** 110 pounds | **Passenger Weight Limit:** 55 pounds per seat

Our Ratings

Assembly 4/5 Design 4/5 Portability 5/5

Maneuverability 4.5/5 Value 4.5/5

Pros

- Tons of storage
- UV-blocking canopy with shades/mesh netting
- Easy to make turns
- Infant car seat adapter included

Cons

- Resistance when fully loaded and pushing

With three ways to ride and tons of storage, the Jeep Deluxe Wrangler Stroller Wagon accommodates all young family members and cargo (110 pounds total). This stroller wagon transforms from car seat mode—with an included infant car seat adapter—to stroller and wagon modes. Two children ages 6 months up to 55 pounds can ride in the stroller wagon's padded seats together, or you can use the car seat adapter to take your newborn and their older sibling along for the ride.

The Jeep stroller wagon is all about comfort and safety for the kiddos, with a removable UV-blocking canopy that features a mesh net for bug protection, pull-down shades, and five-point safety harnesses. We also love how the Jeep Wrangler takes care of parents' and caregivers' needs with tons of storage options. A detachable cooler bag holds up to 15 pounds (or 16 cans), and a parent organizer stores a cell phone, snacks, and more. There are additional exterior storage compartments on the front and back of the stroller wagon and one parent cup holder for a water bottle.

The Jeep wagon stroller's assembly instructions are clear and concise. In our lab, it took us less than 10 minutes to assemble the unit for the first time. After that, folding it was just as painless. When you pull on the handle in the center, the entire wagon collapses. You only have to make sure you remove the canopy beforehand, which conveniently fits in the storage pocket outside of the wagon. An auto-lock latch keeps the stroller wagon together for storage.
