### WHY WE LOVE IT

- ✓ Additional storage space
- ✓ Changing pad is included

### TAKE NOTE

- ✗ Shelves are slightly too short for standard storage cubes

This classic changing table comes in five colors to match any nursery. **The safety rails on all four sides are designed to help keep baby safely away from the edge while the shelves underneath are perfect for storing diapers,** wipes and anything else you may need. Some of our testers noted that the shelves are just a touch too short to fit average storage cubes but are great for shorter plastic bins. At almost 40 inches tall (including the safety rails), this table will be more comfortable for parents of average to slightly taller height.

The included changing pad comes with a safety strap, but the pad can be removed to fit most other changing pads if you want to swap it for one you like better. While testing, we appreciated the additional storage space and found the table to be made of good construction quality for the price. We did notice that the changing pad is on the thinner side so you might want to replace it with one of our [favorite changing pads](#) for a little extra cushion.
