Bely's Premium Flock Flex Vinyl has a rich suede-like velvet touch flex. It is high quality rayon flock and it comes with high density hot-melt at the back of the flex which enables the flex to be attached on the garments firmly. Our Flock flex is used for logos, numbers and letters on the T-shirts or sportswear and due to its special features. It is quite easy for cutting and weeding and it could be used when you want an embroidery effect.

- Creates a lovely finish, feel and texture for leisure, fashion and sports wear.
- Cool Peel after heat pressing

Great for general purpose signs: posters, show cards, banners, window and vehicle graphics, etc

- Up to 5 years outdoor life
- Excellent cutting, weeding, and transferring
- Available in Yards 24" by 36" or Full Roll (24" by 55 Yards)

If ordering 3 yards or less, order may ship as single yards unless specified in notes section. For 3 Yards up to full roll will make continuous.

Sign Vinyl requires the use of Pre Mask for installation.

Printable Sublimation Sheets

Printable Sublimation HTV works with sublimation inks. If you have a sublimation printer - this can be used with any color fabric (even darks) and is compatible with polyester and cotton blends. You do not mirror the print as the material is directly applied to the garment.

You print, cure, and cut your designs then weed away the excess vinyl, and apply the mask to transfer the pattern to your garment.

- 8.5" x 11" sheets, pricing is per sheet.
- Can be applied to cotton, polyester, cotton/poly blends

Printable Ecosolvent Print & Cut Heat Transfer Vinyl (Printable HTV)

BPCW-01
White

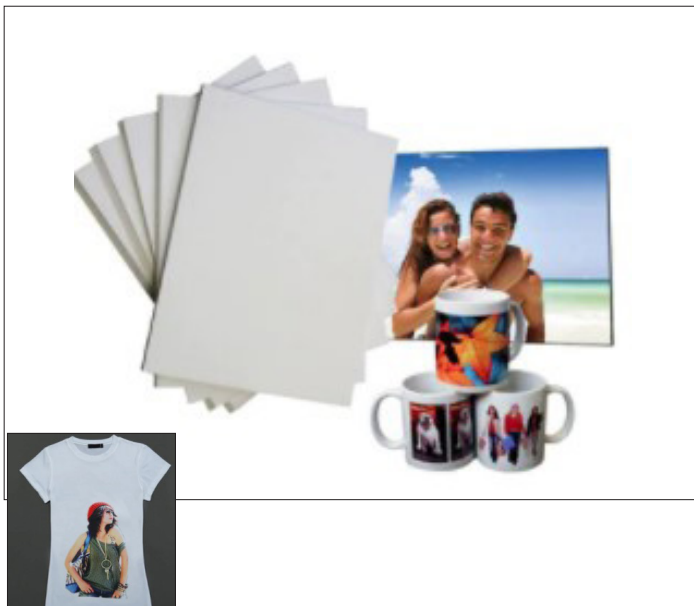

Bely's White, Printable vinyl is our most popular printable transfer vinyl. It is a soft and stretchable vinyl based film specially developed for printing with eco-solvent printers such as Roland and Mimaki etc. This vinyl is not for Inkjet Printers or Sublimation Printers.

- Sticky PET carrier, Warm/Cool Peel after heat pressing
- Smooth cutting and easy weeding
- Shine-free finish
- Elastic and soft
- Excellent ink absorbing
- Mask tape is needed

Packaging

- Standard roll size: Width: 500 mm x As Many Yards Customer Needs
- Standard Roll Per Colour is 27 Yards

Sublimation Paper - A4 Size - 100 Pack

Sublimation transfer paper for your dye-sublimation printer. This paper is for printing onto polyester, and sublimation printable surfaces such as mugs, slates, bottles, and more.

Sizes Available

- A4 Size
- Letter Size 8.5 by 11"
- Tabloid Size 11" by 17"

Application Tape for Printable Ecosolvent Vinyl Prints

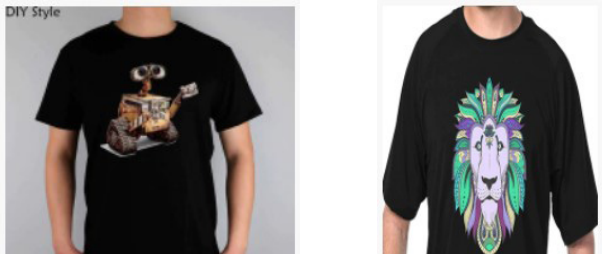

Our application mask allows you to transfer your Ecosolvent designs from the liner to the surface you are applying to. You'll print, cure, and cut your Ecosolvent designs in the positive (Don't Mirror Your Design), then weed away the excess vinyl, and apply the mask to transfer the pattern to your garment.

High tack mask allows for proper application for multi-piece Ecosolvent designs.

Application Tape comes in 1 Yard Rolls of 20 Inches High by 36 Inches Wide.

Inkjet Transfer Paper - Dark Color Fabrics

Dark Heat Transfer paper can produce soft, supple and vibrant and wash-durable ink-jet printed transfers onto dark colored cotton, cotton/poly blends and 100% poly fabrics. This product contains an opaque layer that allows for photo quality images to be transferred, best used for transferring photographs or other designs onto dark garments.

- Soft “hand” feel, stretchable
- Print with any inkjet printers with dye based, pigment based or sublimation inks
- Work with 100% cotton, cotton/poly blends to 100% poly fabrics
- Substrates include: T-shirts, sweatshirts, mouse pads, puzzles, and leather goods
- Excellent washability and durability
- Can be cut with a cutter/plotter, die and kiss-cut
- Use with heat press; home iron can also be used although not recommended (because it may affect the durability)
- Cold peel
- Available Sizes
 - » 8.5” x 11”
 - » 11” x 17”

Printing Instructions:

- Print image on coated side of paper right reading (do not mirror the image).
- Trim away the unprinted areas of the transfer if desired

Transferring Instructions:

- Bend a corner to remove the backing paper from the printed image.
- Place the Heat Transfer Paper on the top of the garment with the image facing up (right reading to you).
- Completely cover the image with one sheet of parchment paper.
- Press: 30 seconds at 350°F/177°C using medium-heavy pressure (30 to 45 psi/2 to 3 bar).
- Once cold, peel away ironing sheet in a smooth even motion.

Washing Instructions:

Turn garment inside out and wash in cold water using a mild detergent. Do not use bleach. Dry on low-heat setting. If you intend to iron the transferred area, ensure that the image is covered with parchment paper before ironing.

Inkjet Transfer Paper - Light Color Fabrics

Light transfer paper produces soft, supple yet vibrant and wash-durable ink jet printed transfers to white and light colored cotton, cotton/poly blends and 100% poly fabrics. It is the easiest to use and has the least “hand” or feel.

- Soft “hand” feel, stretchable
- Print with any inkjet printers with dye based, pigment based or sublimation inks
- Work with 100% cotton, cotton/poly blends to 100% poly fabrics
- Excellent washability and durability
- Use with heat press or home iron
- Available Sizes
 - » 8.5” x 11”
 - » 11” x 17”

Usage Instructions

- Use for white and light colors 100% cotton fabrics
- 375°F
- 20-25 seconds
- Peel Hot
- Heavy, even pressure
- Print in reverse
