SUMARPO

Wetsuits & Trisuits & Compression

OUR MISSION

"At SUMARPO, we are committed to empowering athletes to push their limits and achieve greatness. Our mission is to provide cutting-edge, eco-friendly sportswear that harnesses the power of technology and high-quality materials, enabling athletes to conquer challenges like never before."

We aspire to see every athlete confidently conquer their toughest races while preserving the environment.

AEROATOM

SUMARPO upgraded from Yamamoto Aerodome to new buoyant version - Aeroatom. We made an innovation on the honeycomb structure with perforated NBR buoyant materials that is adding NBR between two layers of pre-treated neoprene, which has an average of 8% buoyancy over the Aerodome series.

SQ-FLEX

Ultra stretch tech fabrics

The combination of SQ-Flex Stretch Inner Lining Fabric and 1 mm of Yamamoto #45 neoprene offers 680% elongation, especially in the shoulders and arms, allowing for unrestricted movement.

SUMARPO

STS

Exclusive back support panels

The Stable Trinity Support system can help maintain a balanced center line and create a side-to-side movement during your swim.

SLIP SKIN

Ultra smooth tech fabrics

The Slip Skin, also known as 'super slippery fabric', features a patented treatment for ultra-smooth surfaces, enabling easier dress and undress. It is also made with recycled plastic water bottles.

A person with curly hair, seen from the back, wearing a black wetsuit with a grey honeycomb pattern. They are holding a surfboard vertically. The background is a beach with waves and a clear sky.
