

EMPTEEZY®

ABPVC

Absorbent Boom with Non-Absorbing Skirt

By deploying the boom with the absorbent facing the spill you can contain and absorb it or by deploying with the face of the boom away from the spill it will act as a containment boom, ideal for light debris or when you want to recover the spill mechanically.

This cost effective, light-weight boom comes in a pack of two providing 10m of cover when joined together.

BOOM MAKE-UP
