

Technical Data Sheet | C260MSS
Chemical Spill Kit - Metal Spill Station | 260ltr Absorbency

This spill station is specifically designed for spill-prone areas such as water treatment plant rooms, dosing points, and pilot plants. It provides a convenient and accessible solution for quick spill response.

Equipped with a roll, socks, and pads, the station can absorb up to 260L of liquid, ensuring efficient containment and clean up. The spill station is available in durable metal construction for long-lasting use, with an optional polyethylene version for added chemical resistance.

Product Specifications

Absorbs	Acids - Caustics - in fact almost any liquid, so ideal when you're unsure what the liquid is
Capacity	260ltr
Spill Station	138 x 58 x 55cm
Contents	100 x pads 50cm x 40cm, 20 x 1.2m socks, 1 x 50cm x 40m roll

Product Features and Benefits

- Includes Roll, Socks, and Pads
- Ensures long-lasting performance in industrial environments.
- Offers chemical resistance for specific applications.
- Suitable for water treatment plant rooms, dosing points, and pilot plants.
- Keeps absorbents organised and readily available.
- Suitable for various industrial and laboratory settings.
