

1 Hour Fire Rated Store - CS6FR

108 containers + floor space

Backed by our 20 year structural guarantee - details available on request.

A rolled hollow welded frame creates a strong structure for this fire rated drum store. The walls, 1250mm wide hinged-doors and roof have been in-filled with Rockwool Firebatt insulation and covered with sheet steel to provide 1 hour fire rating.

A fully seam welded sump, with profiled rib strengtheners, creates a bunded area in case of a spill and base plinths eliminate contact with the ground. High and low level vents fitted with intumescent elements allow air to circulate. However in the event of a fire, these elements will expand and seal the vents, this takes place at temperatures above 150°C.

Shelving is provided on both sides of the store and the bulkhead door, fitted with a single cam door gear mechanism, can be secured with a padlock (not supplied).

The sump fully complies with all the UK regulations relating to sump capacities.

SPECIFICATION

| | |
|--------------------------|--|
| External size | L5920 x W2440 x H2658mm at the highest point on the unit |
| Number of containers | One hundred and eight 25ltr cans |
| Load capacity per shelf: | 500kg |
| Sump capacity | 2196ltr |
| Colour | Green RAL 6029 |
| Tare weight | 3600kg |
