

## Technical Data Sheet | EB0L

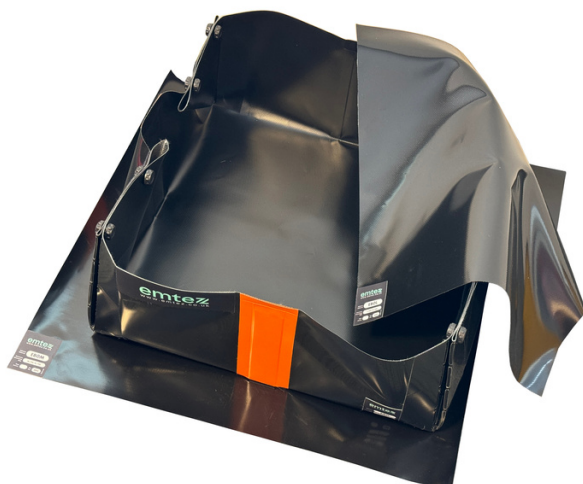

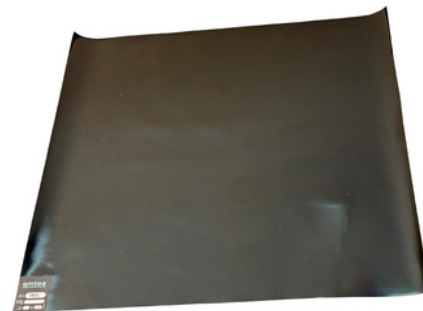

### Multi Function PVC Containment Bund Liner | For EB0

Liners for use with multi-function PVC containment bund EB0.

The PVC liner is designed to prevent cross contamination and protect inside of bund from aggressive liquids. Minimises cleaning of bund after use.

### Product Specifications

|                           |                                                   |
|---------------------------|---------------------------------------------------|
| External Dimensions (WxL) | 500 x 600mm                                       |
| Unit Weight               | Approx. 0.3kg                                     |
| Material                  | PVC with a protective proofing layer<br>(PES/PVC) |
| Material Weight           | 900 g/m <sup>2</sup>                              |

### Product Features and Benefits

- Resistant to chemical and liquid exposure, ensuring long-lasting performance.
- Acts as a protective barrier to isolate different types of liquids during multiple uses.
- Precisely fits the EB0 containment bund to prevent leaks or gaps.
- Protects the bund interior from corrosive or harsh chemicals, maintaining its structural integrity.
- Prolongs the life of the containment bund by reducing exposure to damaging substances.
