

Squeeze Bottle - 14011

The bottle constructed of polyethylene with a stainless steel ball valve to ensure safer, smoother dispensing of flammable liquids directly on small components or subassemblies with a minimum of overspray. Squeezing the bottle produces a fine stream of liquid and the tube can be shaped to dispense into “hard-to-get” areas.

IMPORTANT INFORMATION: This bottle is **not** FM approved.

SPECIFICATION	
Capacity	1ltr
Size	89mmØ x 232mm H
Colour	Translucent white
Tare weight	0.5kg
