

Anti Scald Valve - ASV

A temperature activated valve that continuously senses the water temperature and automatically bleeds the shower/eyewash to ensure the system does not produce scalding water.

The valve is protected with an anti-corrosive Polyamide 11 high visibility yellow plastic coating which provides good resistance to acids, bases, seawater and oils.

Please note: the system operates without an external power supply.

| SPECIFICATION | |
|-----------------------------|---|
| Connection | 1/2" Female |
| Water inlet pressure | Recommended 2 bar with a maximum of 4 bar (Operation not affected by pressure variations) - please notify us prior to ordering if your water pressure is below 1.5 bar. |
